Bioswale Season
The parking lot of Mill Race Center is paved with porous asphalt that allows rain water and snow to pass through, and then be channeled into “bioswales.” The bioswales can be identified by the sections of tall prairie grass, which will be growing rapidly over the next month or so. This tall grass that many folks find inconvenient or unsightly was chosen specifically for its ability to absorb moisture and is the first line of filtration. (Have you noticed that we don’t have “puddles” when it rains?) That is because rainwater passes over and through the porous pavement and is channeled to the areas of tall grass, and any water that is not used by the grass then passes through layers of filtering sediment before it hits the storm drains. This is all part of a carefully designed system that helps us to be good stewards of the beautiful location that we enjoy in Mill Race Park.

Reflexology @ MRC!
Reflexology is a healing art based on the premise that there are reflex areas in the feet and hands that correspond to all of the glands, organs, and parts of the body.

If a practitioner finds sensitive areas on your hands or feet, he/she should work them gently. Reflexology should be a pleasant, relaxing experience. Light touch will be just as effective as deep pressure because reflexology works nerves, not muscles.

Leslie Dyar, a certified reflexologist who received her training at I.U.P.U.I., is available for 30 and 60 minute sessions at the MRC on Monday and Tuesday mornings from 8:00-12:00 and Mondays from 4:00-8:00pm. All sessions are by appointment.

Prices are as follows:

“Hi!” exclaimed the dandelion.
“You’re the same color as me.”
“Hello,” yawned the crocus.
“It’s good to be free
I’ve been underground all winter long.
This sun makes me burst into song.”
The dandelion said, “There will soon be more of us
So we call all join in singing a chorus.
Don’t make long range plans. I’m sorry to say.
