Current Concepts in Cognitive Fitness:
New Research Findings in Brain Health
What do advances in neuroscience, increased longevity, and the baby boomers’ demand for products that promote cognitive vitality have in common? They are all factors in this time of unprecedented knowledge about the brain, cognition and cognitive wellness. Join Dr. Green to learn more about the revolutionary new science of cognitive health, including what the latest science shows about interventions such as lifestyle, cognitive training and social engagement and their impact on brain wellness, and how we can each begin to customize our own path to improved brain vitality.

Cynthia R. Green, Ph.D. is a clinical psychologist, author, lecturer and noted expert in memory and brain health. An assistant clinical professor of Psychiatry at the Mount Sinai Medical School in New York, Dr. Green is the president of TBH Brands LLC, provider of the Total Brain Health (www.totalbrainhealth.com) training services and programs, including the TBH Toolkits, courses in cognitive wellness for adults of all ages.

Defining “seniors”...
The terms that we use to describe older adults will always fall short of the task. Not just because the words are so limited and limiting, but also because of our own personal points of reference. When I was a teenager, someone in their 30’s was an older adult. When I was 30, my definition shifted to 50. Now that I am approaching 60, I think that my parents, who are in their mid-80’s, are older adults. Of course, I don’t define myself as a senior, even though my 16 year old son would certainly put that label on me, and our own definition here at Mill Race Center loosely defines a senior as someone over 50. The truth is that we all define seniors from our own unique perspective, which constantly has to be re-evaluated. We think of Woodstock as a defining moment for youth culture, but the reality is that anyone who attended is now in their late 60’s or early 70’s. The Beatles, Led Zeppelin and the Rolling Stones were before my time. (Did I mention that I am nearly 60?) Many of our members grew up listening to Metallica and AC/DC. We have members who were born after the JFK assassination, and are too young to remember the first Apollo moon landing. My point is that we each get to define for ourselves what it means to be an older adult, senior or elder. Don’t let someone define it for you. Now, break out that Led Zeppelin record and rock on.

Reflexology @ MRC!
Thursday evenings from 3:00-7:00pm
Reflexology is a healing art based on the premise that there are reflex areas in the feet and hands that correspond to all of the glands, organs, and parts of the body.

If a practitioner finds sensitive areas on your hands or feet, he/she should work them gently. Reflexology should be a pleasant, relaxing experience. Light touch will be just as effective as deep pressure because reflexology works nerves, not muscles.

Leslie Dyar, a certified reflexologist who received her training at I.U.P.U.I., is available for 30 and 60 minute sessions at the MRC on Thursday evenings from 3:00-7:00pm. All sessions are by appointment.
